# ClassVision AI — Classroom Intelligence Report

Course: CV101 | Instructor: Academic Instructor | Generated: 2026-11-01 09:41

Provenance Label: REAL_PROCESSING | Privacy: Anonymous IDs only

## 1. Session Metrics Overview

| Metric | Value |
|---|---|
| Total Hand-Raise Events | 1 |
| Left Hand Raises | 1 |
| Right Hand Raises | 0 |
| Both Hands Raises | 0 |
| Average Duration | 2.5s |
| Camera Mount | Rear-Corner Elevated |
| Biometric Profiling | DISABLED |
| Raw Frame Storage | 0 Bytes |

## 2. Lecture Audio Transcription Summary (Faster-Whisper)

Extracted Segment: "I've got to go to him. I've got to go to him. I've got to go to him. I've got to go to him."

## 3. Whiteboard & Slide Content Extraction (EasyOCR)

Detected Board Concepts: Convolutional Neural Netwvorks Out_dim ((W- K + 2Pi /S1 + 1, Convolutional Neural Netwvorks Out_dim ((W- K + 2Pi /S1 + 1, Convolutional Neural Netwvorks Out_dim ((W- K + 2Pi /S1 + 1, Convolutional Neural Netwvorks Out_dim ((W- K + 2Pi /S1 + 1, Convolutional Neural Netwvorks Out_dim ((W- K + 2Pi /S1 + 1, Convolutional Neural Netwvorks Out_dim ((W- K + 2Pi /S1 + 1

## 4. Academic Ethics & Privacy Compliance Statement

ClassVision AI strictly monitors observable physical actions (hand-raising, postures, and gestures) using transient in-memory inference. Zero raw video frames or student facial biometric embeddings are persisted. The system strictly prohibits inferring internal cognitive states such as emotion, attention, or student intelligence.
